## ATTACHMENT A

### Interim Manager Progress Report Concerning Operation of Golden Corridor Water Company

#### Operations and Environmental Compliance

Arizona Water Company ("the Company") is currently billing 57 Golden Corridor Water Company customers pursuant to Golden Corridor's approved tariff. There has been one complaint filed, which was resolved. There are currently no formal customer complaints on file with the Arizona Corporation Commission.

No further sampling for nitrate is needed as Golden Corridor Water Company customers are served water produced by the Company's Casa Grande system.

Water delivered to Golden Corridor Water Company is being chlorinated with an average of 1 mg/L per month. Chlorination results in better protection against bacteria and protection of public health. The Company takes two chlorine residuals monthly at the same locations as the bacteriological samples. There have been no positive bacteriological tests since chlorination.

The Company filed a Disinfectants and Disinfection Byproduct Plan for Stage 1 and Stage 2 with ADEQ in August 2008. As noted, Golden Corridor's water is being chlorinated and sampling for TTHM/HAA5s began in August 2008.

Lead and Copper samples were taken in June 2008 and all of the results were below the action level. Lead and Copper samples will be taken again in June 2011.
